Professional Summary:

Passionate and results-driven Senior Flutter Developer with over 5 years of experience in building high-performance, cross-platform mobile applications for iOS and Android. And over 10 years of native mobile development. Proven expertise in developing complex UIs, state management solutions like Bloc, and integrating RESTful APIs and Firebase. Strong background in native Android (Kotlin/Java) and backend development (NestJS, Laravel), enabling end-to-end application development. Successfully delivered applications in diverse industries including HealthTech, FinTech, and E-Commerce.

Technical Skills:

- Mobile Development: Flutter, Dart, Kotlin, Java, Swift
- State Management: Bloc, Provider, Riverpod, GetX
- Backend Integration: RESTful APIs, GraphQL, Firebase, Socket.io
- Database: SQLite, Hive, ObjectBox, Firebase Firestore
- Tools & DevOps: Git, Docker, CI/CD (GitHub Actions, Codemagic) Android Studio, VS Code
- Publishing: Google Play Store, App Store, Iranian markets (Cafe Bazaar, Myket, Sibapp)
- Additional Skills: NestJS, Laravel, typescript, php, Agile/Scrum, html/css

Professional Experience:

Flutter Team Lead | Caloria (Health & Nutrition) | 2020–2022

- Led development of a health and diet management app using Flutter, serving users in Canada
- Implemented Bloc state management for scalable and maintainable codebase
- Reduced app crash rate through performance optimization and improved memory management
- Mentored and managed a team of junior developers

Senior Kotlin Developer | [Infinite8](#) | 2019–2020

- Develop native Android applications for enterprise clients in Dubai and Iran
- Maintain IranApps (android app market) android application
- Optimized app performance and reduction in crash rates
- Collaborated with cross-functional teams to deliver high-quality products

Freelance Mobile Developer | Self-Employed | 2015–2025

- Delivered over 15 cross-platform and native mobile applications for clients across various industries
- Worked with companies like Rahinoo, Cheetah-Service, [Forghoon](#), OxConnect, English Learning app, ...

InBook Platform: 2016-2019 (part-time)

- Developed and maintained a comprehensive printed photo ordering and delivery application using Kotlin/Java.
- Implemented features for order tracking, secure payment processing, and user management
- Integrated with RESTful APIs to ensure seamless data synchronization and enhanced user experience.
- Creating virtual albums

Notable Projects:

- Caloria App: A health and diet management application built with Flutter and Bloc
- [Decmitr](#): A FinTech app for real estate investment tracking (NestJS backend)
- E-Commerce App: A complete shopping experience with payment integration (Flutter + Laravel)
- Social Media [\(coideate\)](#): Building scalable and engaging social platforms, featuring real-time
- Healthcare Management System [\(BabaTeck\)](#): Patient appointment booking and management
- Mobile Backend Services: Various API services supporting Flutter and Android applications [\(IranApps\)](#)

Education:

Bachelor of Science in Computer Software Engineering
Azad University, Qazvin, Iran | 2008-2014

Additional Information:

- Languages: Persian (Native), English (Professional Proficiency)
- Contributor to open-source projects
- Regular participant in tech meetups and conferences
- Mobile development expertise provides unique perspective on API design
